

Win10 系統更新後，開啟 DRM_Player 出現 java 停止運作時解決方法說明

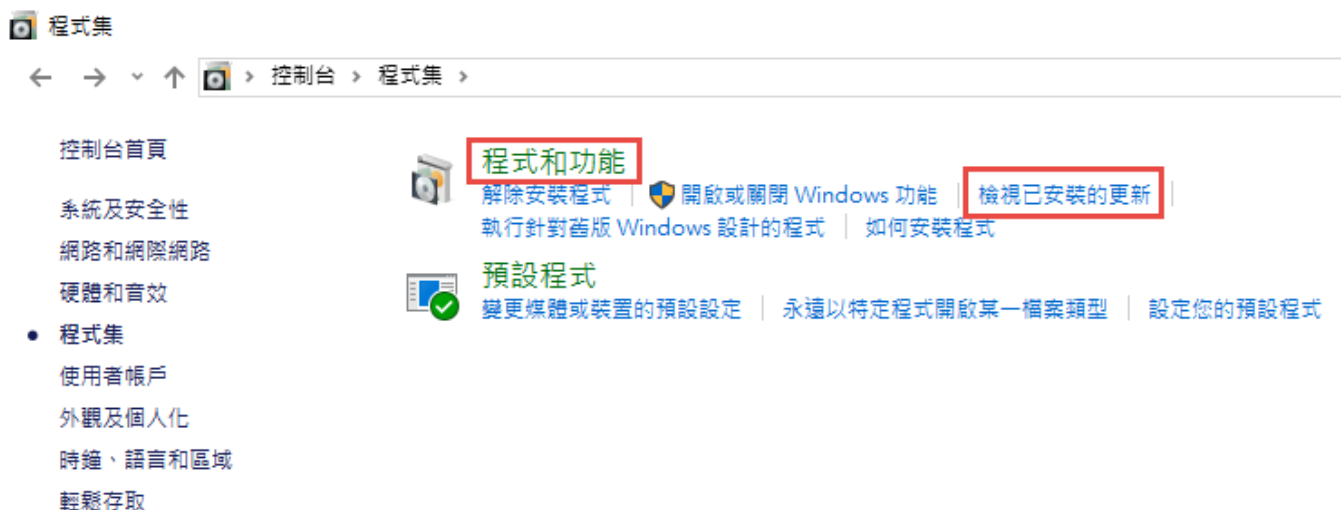

Windows 10 更新檔 [KB4013429](#)，與 java 相衝突導致 DRM 無法正常使用，須先移除更新檔並設定為不更新，請依照下圖步驟依序設定即可

一、解除更新檔 [KB4013429](#)

從 [已安裝的更新] 中解決安裝特定更新

1. 開啟控制台 \ 程式集 \ 程式和功能，選擇 [檢視已安裝的更新]。

2. 點選您要解除安裝的更新，例如 [Microsoft Windows 的安全性更新 (KB4013429)]，選擇 [解除安裝]。

The screenshot shows the Windows Update 'Installed Updates' page. The navigation path is 'Control Panel > Appearance > Appearance and Features > Installed Updates'. The page title is '解除安裝更新' (Uninstall Updates). Below the title, there is a message: '若要解除安裝更新，請從清單選取更新，然後按一下 [解除安裝] 或 [變更]' (To uninstall updates, select updates from the list, and then click [Uninstall] or [Change]).

The '解除安裝' (Uninstall) tab is selected. A table lists installed updates with columns for Name, Program, Version, and Publisher. The update 'Microsoft Windows 的安全性更新 KB4013429' is highlighted in blue, and a context menu with the option '解除安裝(U)' (Uninstall) is open over it.

二、為避免 Windows Update 重新更新，須設定隱藏更新

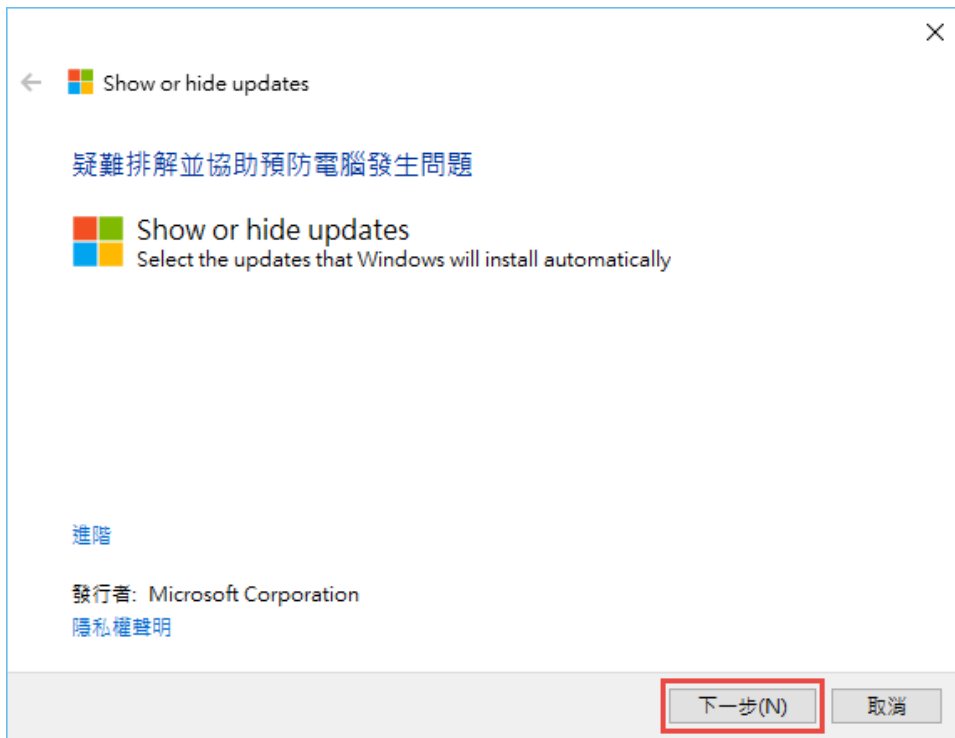

1. 下載官方工具 [Show or hide updates]，下載網址：

<http://download.microsoft.com/download/F/2/2/F22D5FDB-59CD-4275-8C95-1BE17BF70B21/wushowhide.diagcab>

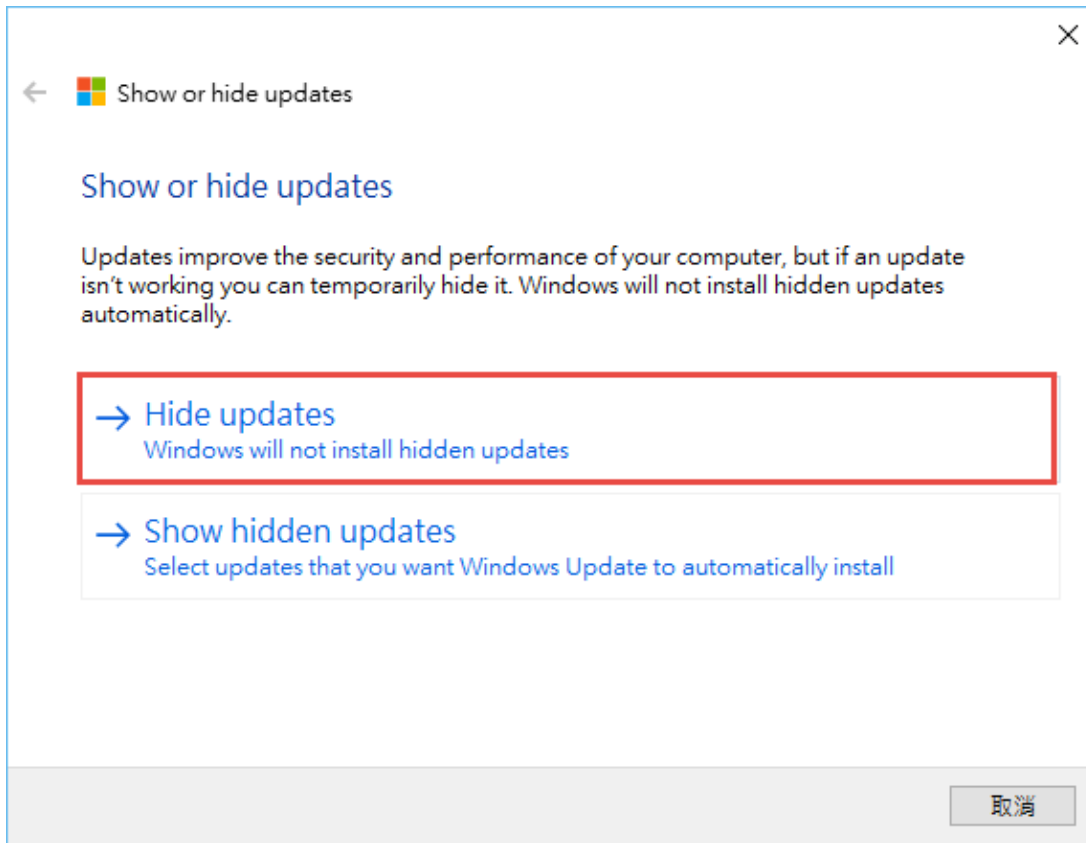

下載後執行 wushowhide.diagcab。

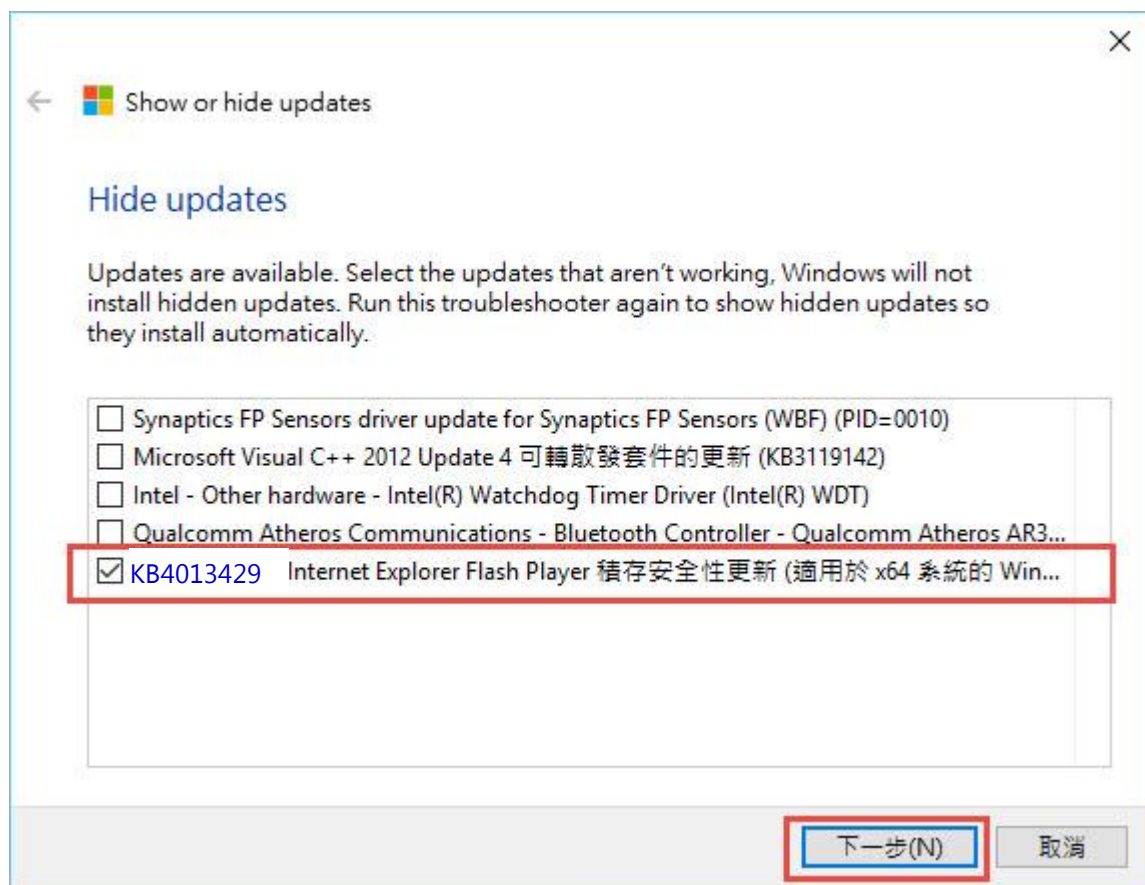

2. 按 [下一步]。

3. 選擇 [Hide updates]。

4. 將要隱藏更新的 KB 做勾選，[KB4013429](#)，按 [下一步]。

5. 隱藏更新完成，按 [關閉]。

6. 後續如果要取消隱藏更新，可在先前步驟中選擇 [Show hidden updates] 來取消隱藏更新。

←  Show or hide updates

Show or hide updates

Updates improve the security and performance of your computer, but if an update isn't working you can temporarily hide it. Windows will not install hidden updates automatically.

→ Hide updates
Windows will not install hidden updates

→ Show hidden updates
Select updates that you want Windows Update to automatically install
